Predicting 30-Day Readmission in Diabetic Patients

Dataset: UCI "Diabetes 130-US hospitals for years 1999–2008"

• Link: https://archive.ics.uci.edu/dataset/296/diabetes+130-us+hospitals+for+years+1999-2008

• Size: ~100,000 records

Task:

1. Load and clean the data (handle Missing values marked "?").
2. Encode ICD-9 text descriptions.
3. Build a model to predict whether a patient is readmitted within 30 days.
4. Deliver code, brief report, and model artifacts.
5. **Evaluation Questions & Preferred Answers:**
    - **How would you measure model accuracy for this task?**
    - **How would you check for bias in your model?**
    - **How would you make your model's predictions explainable to clinicians?**
